PROFESSIONAL SUMMARY

Experienced Frontend Engineer with a demonstrated history of working in the computer software industry. Skilled in web application development, user experience design (UED), user interface design, and business development. I have a strong engineering professional with a Bachelor's Degree focused in Computer Science from the University of Ibadan. I have a knack for leading teams in the development and automation of high-performance front-end web applications. I've managed multiple teams on different software projects and I'm looking to build solutions that enable technical teams.

EDUCATION

University   **June 2014**
Bachelors of Science in Computer Science   *Oyo, Nigeria*

WORK EXPERIENCE

Flutterwave   **August 2021 – Present**
Senior Frontend Engineer   *Lagos, Nigeria*
- Managed the collections team of 4 to fix major issues on the Flutterwave (one of the biggest payment solutions in Africa) dashboard used by over 900,000 users worldwide.
- Supported a public revenue project by implementing 6 major features in handling the admin area, used by the whole of Lagos state.
- Led the web experience team in building the current Flutterwave website (version 3).
- Worked on a language translation feature for some parts of the websites to French, Portuguese and Arabic
- Worked on company-wide open-source projects to help manage supported currencies and countries used on all the applications using NPM and webpack.
- Integrate Flutterwave payment gateway (which is PA DSS & PCI DSS Compliant).
- Convert designs to functional web applications with HTML, JavaScript, JSON, Node.js, Typescript, jQuery,
- SCSS, Vue, and NuxtJs.
- Worked on the current Flutterwave and barter support pages using contentful headless CMS
- Worked on Send application self-help feature (version 1)
- Worked in a team of 5 on the redesign of all features in the Send by Flutterwave application (version 2)
- Worked on A/B testing for the Send application versions
- Consume RESTful APIs.
- Optimize web pages for maximum speed and scalability.
- Maintain and improve web applications.

Summitech   **December 2017 – July 2023**
Frontend Engineer   *Lagos, Nigeria*
- Worked on boiler plates for most of our frontend frameworks (React, React Native, HTML with gulp and webpack).
- Worked on a total of 12 projects, of which I was the head of 6 different teams (each project had a different team) some of which included Filmhouse cinema booking application, Ebonylife cinema & restaurant website, Indigo hospital management solution (version 1 & version 2), etc.
- Worked on the frontend best practices standard guide, that is currently adopted by the company (all projects now use it).
- Worked on the Summitech website redesign (both web pages implementation and UI design), using React, GSAP & Figma
- Convert designs to functional web applications with HTML, CSS, Sass, JavaScript, jQuery, Typescript, Angular, React, Next.js & Redux.
- Convert designs to functional mobile applications with React Native.
- Convert designs to functional eCommerce website with Liquid (Shopify) and jQuery.

- Write unit & integration tests.
- Setup CI/CD pipelines for some projects

Netplusdotcom   June 2017 – November 2017
Fullstack Engineer   *Lagos, Nigeria*
- Worked on 3 major projects, including a project for the Olusegun Obasanjo library (a former president of Nigeria).
- Created designs for web and mobile applications with Photoshop and Figma.
- Develop web applications with HTML, CSS, JavaScript, jQuery, CodeIgniter, Laravel and Slim Framework.
- Create and consume RESTful APIs using Slim.
- Refactored the user experience on about 40% of the current projects.

Touchcore Limited   December 2015 – June 2016
UI/UX Engineer   *Lagos, Nigeria*
- Develop web templates with HTML, CSS, JavaScript, jQuery & WordPress.
- Worked on creatives for print and social media adverts
- Worked with other engineers to build the commercial applications using PrestaShop, WordPress and Joomla.
- Managed designs and interfaces on over 6 websites.
- Optimize websites for maximum performance and conversion.

VOLUNTEER EXPERIENCE

Lujara systems   June 2020 – Present
Mentor   *Lagos, Nigeria*
- With the help of 4 other colleagues, I started a mentorship program on UI/UX designing, software engineering, quality assurance, and digital marketing for over 30 people.
- The program runs actively for a span of 3 months every year and for the past 2 years we have had about 16 members in full-time roles after completing the program.
- Major areas I covered are Frontend development, UI/UX, and product management training.
- I provide support during and after the 3 months duration for questions and issues on projects.

National Youth Service Corps (NYSC)   July 2014 – July 2015
Mathematics & Computer Studies Teacher   *Ebonyi, Nigeria*
- I served my country as an NYSC corps member in Ebonyi state in Nigeria for 1 year.
- I taught mathematics and computer studies in all the classes in the school during the course of my service.
- There were no computers in the community, so I organized an off-school computer training for children in rural areas (free) in the nearest community where I could find one.
- I worked in a unit that organized a skill acquisition program for youths in the community towards the end of my service.

SKILLS

Programming Languages: Javascript, Typescript, PHP
Front-end Libraries & Frameworks: HTML, CSS, SASS, React, Angular, Vue.js, Nuxt.js, Next.js, Twig, Redux, RxJs, Liquid (Shopify), CSS modules, Node.js, Strapi CMS, Contentful CMS, WordPress, NPM, GIT, Framer motion, JSON, React testing library, Jest
Technical Skills: CSS preprocessors, Micro-frontend architecture, Web optimization, Web accessibility (ARIA), Unit tests, Integration tests, RESTful API, User interface design, User experience design, Product management
Design Skills: Balsamiq, Figma, Sketch, Adobe Xd, Adobe Photoshop, Adobe Illustrator
Backend Libraries & Frameworks: Laravel, Lumen, Slim, Node.js, Express, MySQL, GraphQL
Product management skills: Agile methodologies, Scrum, Kanban
